

IT'S THE LAW: BEFORE MOVING, CHECK FOR THE GYPSY MOTH

What Does the Law Require?

If you are moving from a gypsy moth quarantine area to a non-quarantine area, you must inspect your outdoor household items for the gypsy moth and remove all life stages of this destructive insect before you move. You and your moving company may face penalties if you are required to inspect but fail to do so. Fortunately, this inspection is easy to do, and you will protect your new neighborhood from a voracious leaf eater that can attack 300 kinds of trees and shrubs.

How Do I Know if I Live in a Gypsy Moth Quarantine Area?

Visit www.YourMoveGypsyMothFree.com and click on the U.S. map to find out if you live in a quarantine area. If you do, you will need to inspect your outdoor household items for gypsy moth if you're moving to a non-quarantine area. If you do not live in a quarantine area, this law does not apply to you.

I Live in a Quarantine Area and Am Moving to a Non-Quarantine Area. How Do I Meet This Legal Requirement?

 Use the self-inspection checklist on the back of this flyer or hire a qualified certified applicator to inspect your outdoor household articles. If you are moving between April and August, you should complete the inspection on moving day, if possible. If you cannot complete the inspection on moving day, you must protect the items from the possibility of infestation by sealing them under a tarp or keeping them indoors or in a closed moving truck.

For self-inspection, follow these steps:

- Carefully inspect all surfaces and crevices of your outdoor household articles such as patio furniture, lawn equipment, toys, grills, trailers, and vehicles for gypsy moth egg masses.
- Remove and destroy any egg masses you find. Scrape them off with a putty knife, stiff brush, or similar hand tool. Dispose of egg masses and other life stages in a container of hot, soapy water, or place them in a plastic bag, seal it, and set it in the sun.
- Check each item off on your checklist as you go, and complete the requested information.

If a qualified certified applicator performs the inspection, be sure you get a copy of the completed, signed checklist.

- 2) During your move, keep a copy of the completed checklist in the vehicle moving the goods in case a U.S. Department of Agriculture (USDA) or State official requests it at any point during your trip. If you are not driving, provide a copy to the driver. This completed checklist is an official certificate that will satisfy the requirements of all non-infested States.
- 3) Once your move is completed, you may want to keep the checklist filed with your moving materials for at least 5 years in case you need it in the future.

Where Do I Go For Help?

- See the back of this flyer for photos of all gypsy moth life stages.
- Learn more at www.YourMoveGypsyMothFree.com.
- Contact your State department of agriculture or nearest USDA Animal and Plant Health Inspection Service (APHIS) office (www.aphis.usda.gov/StateOffices).

USDA is an equal opportunity provider and employer.

This publication supersedes Program Aid No. 2065, "Your Next Move Gypsy Moth-Free," which was published in October 2010.

Issued October 2013

CHECKLIST

IMPORTANT: Make sure this checklist goes with your outdoor household items when you move!

Checklist and Record of Your Self-Inspection Date:		
Originating property address:		
Recreational or Camping Items	Districts	C'i Tama
□ Backpacks	□ Ice chests	☐ Tarps
☐ Basketball backboards	☐ Motorcycles	☐ Tents
■ Bicycles	■ Motor homes	☐ Waders or boots
■ Boats	Recreational vehicles	Other:
☐ Boat trailers	Snowmobiles	
☐ Campers	□ Sports equipment	
Household Items		
□ Air conditioners	■ Ladders	Tanks for propane and oil
☐ Barrels	Outdoor doormats	Television antennas
Cardboard and wooden boxes	Outdoor thermometers	□ Trash cans
